---

Rafael,

If you are OK with the AO, then we should go ahead and incorporate your comments and finalize the AO.

The only question I have is in regarding to the previously approved WP. Will they be required to submit a new schedule for completing the RI/FS? It will have to be approved by EPA and meet the CERCLIS schedule which is completing the RI and FS by March or April of 2012 so that we can have a ROD signed by September 2012. The site activities have drag out too long and we need to have a tight schedule from now on that will include stipulated penalties if deliverables are not meet. CAS

Gloria, I'm ok with the language of the AO, but I am waiting for Carlos' comments as well. I will let you know as soon as I hear from him.

I do have two points of clarification:

Concerning the \$113k in H.7. on the replenishment of the SA, please verify this amount with Doretha. I believe it is a little more than that by now.

Also, concerning Part H.4., where NORCO agrees to perform the RI/FS according to the previously approved WP, etc. We need to verify that all of our comments have been addressed in the final deliverables. Additionally, I don't believe the new contractor has a Work Plan issued under their name. I have only seen the FSP and QAPP submitted under the new contractor.
